Mine Entry

✕   Adit
✕   Gutter Pit
✕   Shaft

The Coal Authority has records of over 175,000 mine entries within the UK captured in the National Coal Mining database, derived from sources including abandonment plans, geological and topographical plans.

Coal mining activity is recorded as far back as the 13th century, but prior to 1872 there was no requirement to deposit abandonment plans. It is therefore believed there may be many unrecorded mine entries of which the Authority has no information or knowledge. These entries do not, therefore, appear within the Authority's national dataset as shown on this map.

This map displays the noise levels from nearby network rail and HS1 railway routes that affect this property...
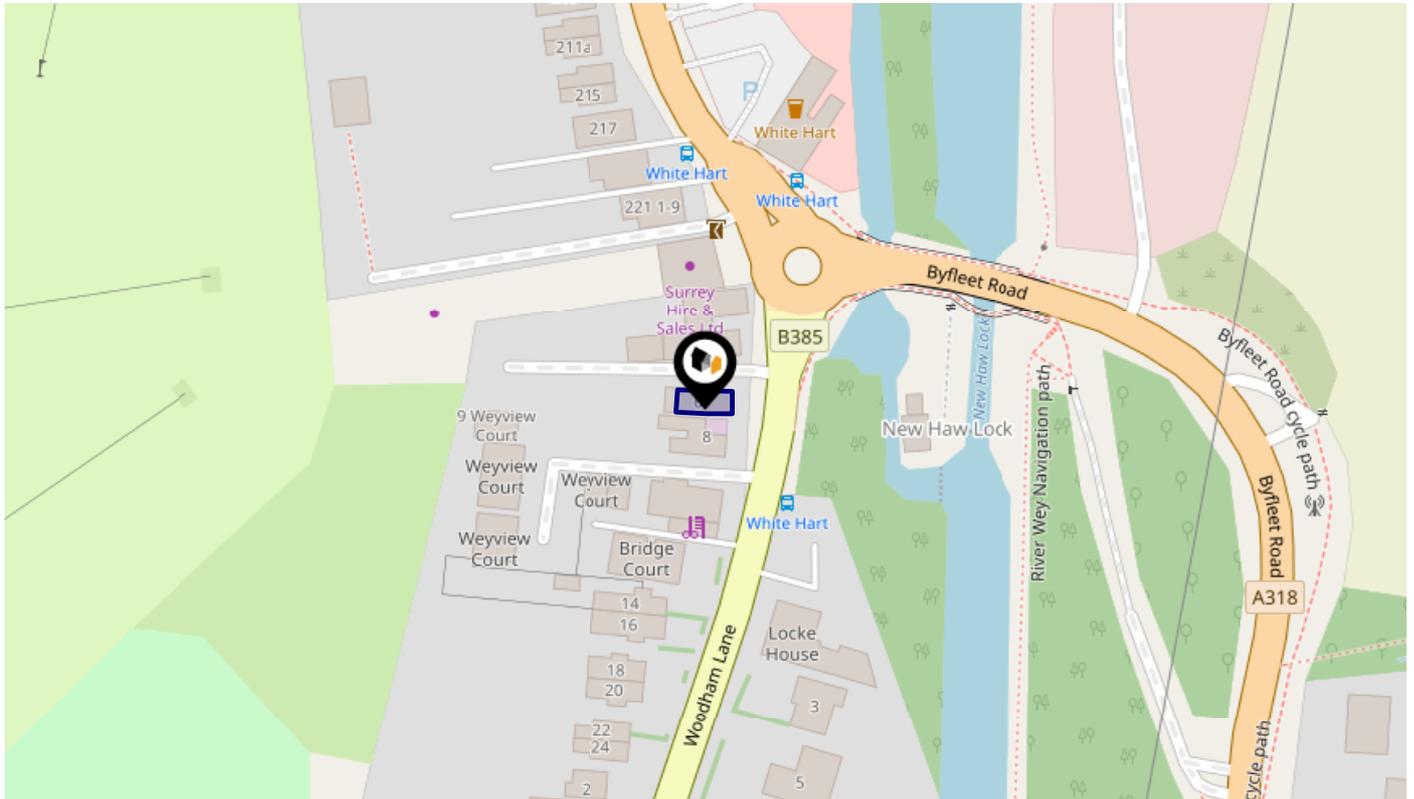

Rail Noise Data

This data indicates the level of noise according to the strategic noise mapping of rail sources within areas with a population of at least 100,000 people (agglomerations) and along Network Rail and HS1 traffic routes.

The data indicates the annual average noise levels for the 16-hour period between 0700 - 2300.
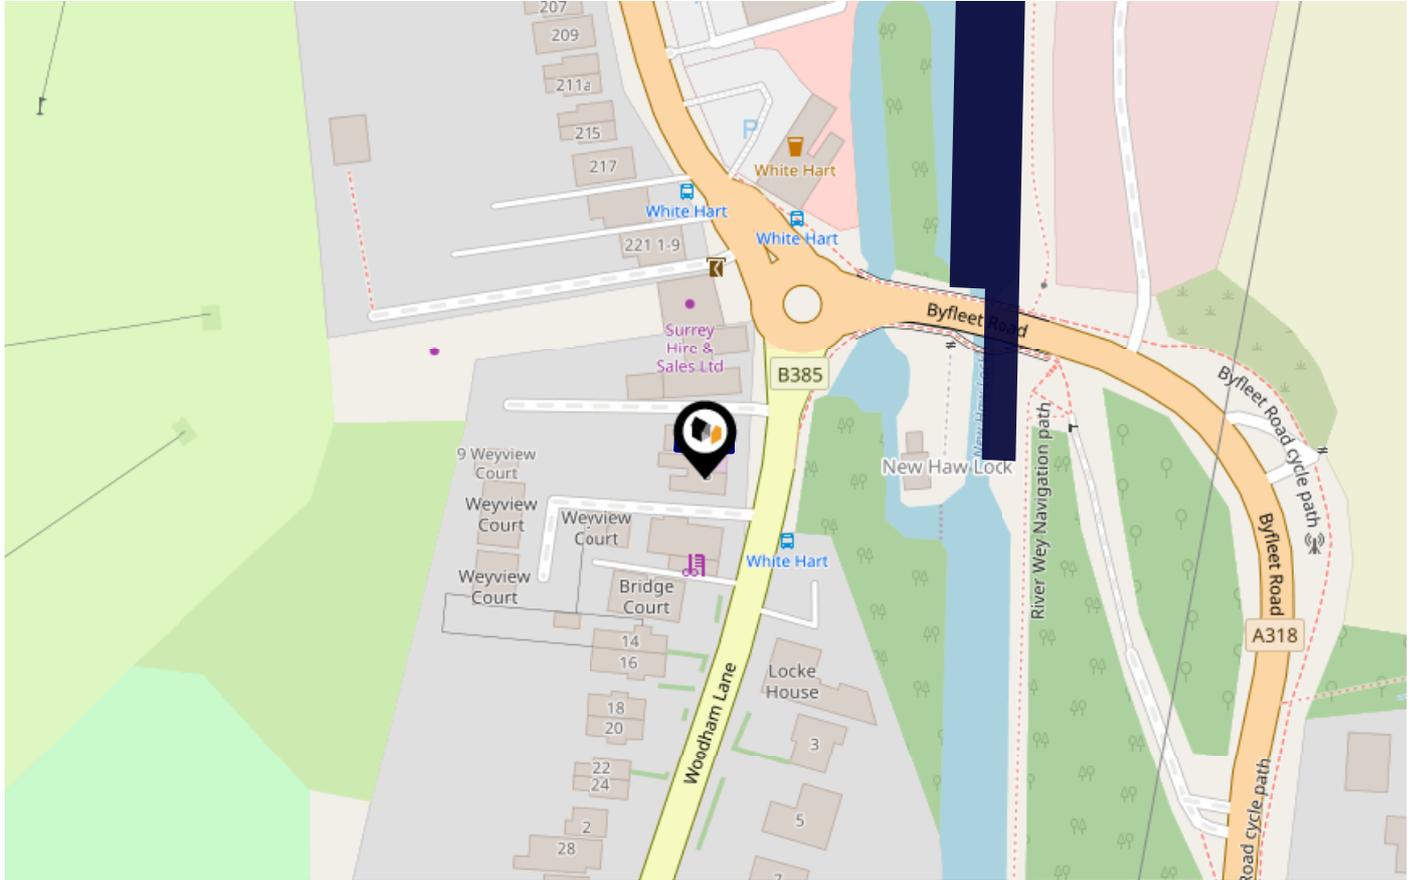

Noise levels are modelled on a 10m grid at a receptor height of 4m above ground, polygons are then produced by merging neighbouring cells within the following noise classes:

5	75.0+ dB	🟥
4	70.0-74.9 dB	🟧
3	65.0-69.9 dB	🟨
2	60.0-64.9 dB	🟩
1	55.0-59.9 dB	🟦

This map shows the chance of flooding from rivers and / or the sea, taking into account flood defences and their condition.

Risk Rating: Very low

The map does not contain sufficient information for it to be used to determine flood risk to individual properties, but it does give you an indication of whether your area may be affected by surface water flooding at this risk level.

High Risk - an area which has a chance of flooding of greater than **1 in 30 (3.3%)** in any one year.

Medium Risk - an area which has a chance of flooding of greater than **1 in 100 (1.0%)** in any one year.

Low Risk - an area which has a chance of flooding of greater than **1 in 1000 (0.1%)** in any one year.

**Very Low Risk -** an area in which the risk is below **1 in 1000 (0.1%)** in any one year.

Chance of flooding to the following depths at this property:

		Very Low	Low	Medium	High
Up to 20cm (8in)					
Up to 30cm (1ft)					
Up to 60cm (2ft)

Environment
Radon Gas

What is Radon?

Radon is a natural radioactive gas, which enters buildings from the ground. Exposure to high concentrations increases the risk of lung cancer. The UK Health Security Agency (UKHSA) recommends that radon levels should be reduced in homes where the annual average is at or above 200 becquerels per cubic metre (200 Bq/m3).

Testimonial 1 ★ ★ ★ ★ ★

I was recommended to Philip Arnold by my solicitor for a probate valuation. Initial contact was good and a very swift reply secured a meeting. Philip was very amenable and spot on time, he carried out the valuation of the property in a very professional manner, explaining every point as he went round. The in depth report came within a few days. It was good to deal at all levels with an honest and professional team. I would have no problem in recommending.

Testimonial 2 ★ ★ ★ ★ ★

A very professional and friendly service. Philip was recommended to us and the service provided was prompt and Philip friendly and courteous. We expected to wait several days to receive the info we required and to our surprise an email with the file was provided within a couple of days although during our appointment he had shared he was very busy. All in all a great service and would recommend Philip Arnold Auctions.

Testimonial 3 ★ ★ ★ ★ ★

Philip Arnold was very helpful in providing a probate valuation for my mother's house. A prompt and efficient response in providing the report and very helpful when when HMRC wanted to verify the value. It all went smoothly.

Testimonial 4 ★ ★ ★ ★ ★

Phillip is a professional person who has done several valuations for us over the years. He is a friendly and helpful gentleman. Julie is very efficient in sending us the invoice.
